# A BRIEF TIMELINE OF
DATA BREACH

A timeline of events describing the attackers and company's approach towards data breach.

Slickwrap's zendesk **hacked**

Reading several customer tweets **Lynx0x00 decides to** investigate

Loopholes and **vulnerabilities** unfold.

SPECTRE AND MELTDOWN

Informed with a subtle **public tweet** and an email to their customer support

Tweeted again with a little **hint** and as a **proof** uploaded a .txt file to their server

As a **response** from Slickwraps Lynx was **blocked**

Besides ignoring tweets, Slickwraps **blindly** making changes and trying hard covering the attack

Lynx still **posts** on twitter mocking company's ignorance to all his tweets.

Another **analyst noticed** the posts alongwith many others exploring the server

Slickwraps still **withholds** their silence.

Slickwraps opens a **line of communication** in a strangest possible way

Lynx **communicated** all the vulnerabilities followed by an email directly to the CEO

In no time Lynx was **Blocked again!**

Finally a **statement** was released by Slickwraps mentioning the attack and also stating that it was all taken care of
